

Our Continued Response to COVID-19

At Anthology, our top priority is to protect the health and wellbeing of all who live and work at our communities. We are committed to maintaining best-in-class safety practices that adhere to CDC, state, and local guidelines, and to providing programs and activities that nurture wellness in body, mind, and spirit during this challenging time.

Communication

To keep you informed, we share corporate and community updates through frequent emails, phone calls, and website and social media postings. And, you are welcome to reach out directly to us with questions or concerns.

RESIDENT WELLNESS

Socially Distanced Engagement Program

We created programs and activities to nurture wellness in mind, body, and spirit. We provided Alexa devices for residents' suites, to access music, news, and games, and to hear group activities and broadcasts.

Together Apart

We help residents stay connected with loved ones by phone, video chat, email, window-visits, in-person visits where permissible, and socially-distanced celebrations such as family car parades.

Telehealth Appointments

Residents can safely meet with their doctors using telehealth technology, including Anthology-provided iPads and vital monitoring tools.

Entice In-Room Dining

Daily snacks, beverages and three nutritious, chef-inspired meals are delivered for residents to enjoy in their suites. We also have mobile happy hour, with themed beverage carts!

COMMUNITY WELLNESS

PPE Procurement

We have ensured that our communities have an ample and steady supply of personal protective equipment (PPE) and hygiene supplies.

Helping Our Heroes

We have implemented a program to acknowledge, support and motivate our dedicated team members. We increased wages and bonuses, set up support hotlines, and instituted spirit contests and awards.

Testing and Screening

We test team members for COVID-19 on an ongoing, randomized basis. We test residents whenever needed. We screen residents, team members, care partners, and visitors daily for fever, symptoms, or exposure.

Visiting

We maintain vigilant visitor policies adapted to local circumstances and regulations. We facilitate visits wherever possible, while maintaining safety measures to limit exposure.
