PERMISSION FOR ANESTHESIA / SURGERY

I, the undersigned, authorize **Pusch Ridge Pet Clinic**, PLLC to administer such treatment, anesthesia and /or surgery as has been agreed upon, and additional procedures as are considered therapeutically and / or diagnostically necessary. I understand that the doctors and staff will use all reasonable precaution against injury or escape.

I understand also that there are risks associated with general anesthesia, ranging from nausea to strokes or even death.

I have the authority to authorize these procedures and agree to hold harmless Pusch Ridge Pet Clinic and its agents and assigns. I also assume financial responsibility for all charges incurred for this patient and agree to pay all charges when I pick up my pet.

In addition, please note the following conditions for admission of your pet into the hospital. These help ensure the safe and efficient treatment of your pet as well as other patients.

- All pets must have current vaccinations against common infectious diseases.
- Pets with fleas or ticks will be dipped or otherwise treated. •
- Pusch Ridge Pet Clinic is not staffed 24 hours and personnel are not on the premises overnight.

Pre - Operative Profile

We understand and share your desire that the procedure for your pet is as safe and uneventful as possible. For the benefit of your pet and your peace of mind, we offer a Pre-Operative Profile as a means of gaining important information about your pet's health status prior to surgery. All of the following tests are available for \$62.72

Clatting Time	Major Organ Functions Glucose - screening for diabetes ALT - liver function	Complete Blood Count Red blood cell count White blood cell count
Clotting Time Ensures that bleeding disorders such as hemophilia an tick fever are not present.	and BUN - kidney function	Hematocrit Hemoglobin Level Differential white cell count Platelet count

Microchip Pet Identification

The AKC Companion Animal Recovery ID System is in place throughout the U.S. and Canada to permanently identify pets. An individually coded microchip the size of a grain of rice is implanted under the skin of the shoulder. Your pet is then registered with the American Kennel Club and allows your pet to be returned to you if lost instead of adoption or euthanasia. The cost of the implant is 67.07 and a one-time registration fee with the American Kennel Club is \$17.50.

Doppler Blood Pressure Monitoring

Doppler monitoring is also available for pets. This instrument measures the patient's blood pressure while under anesthesia in addition to the heart rate. It allows our technicians and doctors to actually hear each pulse in real time and monitor it's rate, rhythm, character and strength. This instrumentation is in addition to the usual monitoring equipment, providing an extra margin of safety for your pet. The fee for Doppler Blood Pressure Monitoring is only \$ 31.07.

Please proceed with:

] Pre-operative Profile

- AKC Microchip
- Doppler B.P. Monitoring

In addition to the agreed upon surgery / anesthesia.

I decline all of the recommended optional items, but please proceed with the agreed upon surgery / anesthesia.
