

Martha Shaver

Martha Shaver was a Business Manager for JMG in Kansas when her husband was diagnosed with ALS. Tom Shaver lived a joyful life with his wife of 37 years, Martha Shaver. Together they had two daughters, Ashley and Quinci, two wonderful son-in-laws, and two grandchildren that were their pride and joy. In November of 2012 Tom was diagnosed with ALS, also known as Lou Gehrig's Disease. For a year, Tom and his family lived with joy as they learned to adapt to a disease that takes over the body so quickly. Three days after Christmas in 2013 Tom lost his battle with ALS. Tom is missed by all that knew him, but knowing that he is not living with this dreadful disease has brought comfort to his family and friends. Martha is still part of the JMG family in her heart. The JMG family did the ice bucket challenge in honor of Tom across the country and donated money to the ALS research. Over the last 2 years Tom's Crew has raised almost \$12,000 for ALS research. It is a disease that needs to be properly funded so a cure can be found.
