

Think Research Partners with Milestone Retirement Communities for Streamlined Admissions Processes

Toronto, ON – Think Research (the “Company”), a leading digital healthcare platform provider, today announced that the Company has partnered with Milestone Retirement Communities, LLC (“Milestone”), an industry leader in the seniors housing industry, to rollout a digital admission solution in Symphony at Cherry Hill using Think Research’s eForms product.

The traditional admissions process is time consuming, inefficient, costly and prone to human error. Think Research’s eForms are a fully customizable paperless admissions solution that reduces costs for administrators and frees up time for communities to spend caring for patients. While eForms retain the look of traditional paper admissions agreements, they are filled out with just a few clicks in order to ensure that the right information is captured from the right people at the right time.

“We’re pleased to be unveiling Think Research’s eForms solution as a part of the launch of our new state-of-the-art seniors’ care facilities in Cherry Hill, New Jersey and Freehold, New Jersey,” said Joe Jedlowski, President of Milestone. “We know that providing high-quality care for our seniors starts at the admissions process, so we wanted to modernize and streamline our operations with a tool that fit our existing workflow. Think Research delivered the solution that best fit our needs and the needs of our residents.”

“Think Research is very happy to be partnering with Milestone to help them rollout paperless admission at their New Jersey locations. They’re a clear leader in a seniors housing industry that is undergoing rapid growth, and with that growth it becomes essential to streamline operations and focus time and resources on where they matter most: patient care,” said Sachin Aggarwal, CEO of Think Research. “We applaud the management at Milestone for taking this step and pushing for better healthcare solutions and outcomes.”

About Milestone Retirement
