

Update September 11, 2020:

Our community remains symptom and Covid-free. We also wanted to share that our building remains safe from local fires at this time. While the air quality is not its best, we have excellent filters for our HVAC system and are being mindful to stay indoors as much as possible. We have plans for emergencies, such as fires, to help keep our residents safe and comfortable. We would like to take this opportunity to thank the many first responders who are helping keep our local community and state safe at this time. You are truly heroes!

Update Aug. 28, 2020

Bozeman Lodge is committed to keeping our residents safe and we need your assistance. For the safety of your loved one and all our residents, we are requesting that you contact us by phone prior to any attempt to visit the community. Our residents are in the high-risk group for Covid-19 and may have medical conditions that put them at extremely high risk of becoming severely ill with Covid-19 symptoms.

We acknowledge and understand Gallatin County's ordinance allowing visitors in long term care communities; however, there is specific criteria that must be met before limited visitation can occur. The guidelines for visitation were provided by the Gallatin County Health Department today, August 28th. We are currently in the process of meeting all guidelines to allow for safe visitation. Once the criteria is met, we must provide written certification to the Gallatin County Health Department and request approval to allow the limited visitation. This process may take more than two weeks, due to the requirement regarding two consecutive weeks of negative test results for all staff and baseline testing for all residents.

The Gallatin County Health Department has encouraged our residents and family members to reach out to them directly if you have concerns or questions regarding the ordinance. They can be reached at 406-582-3100.

We are preparing our buildings and staff to completely comply with all directives regarding visitation. We will be sending out the specific guidelines as soon as they are approved by the Health Department.

Again, our primary goal is every resident's health and safety. Thank you for partnering with us in this endeavor.

Please see our most recent update about our Covid-19 Response:

Update: Aug. 20, 2020

As the progression of Covid-19 has affected the entire country, we remain committed to the health and wellness of our residents and team members. Radiant Senior Living, and our communities, have been implementing extra precautions since the first reports of confirmed Coronavirus cases in the United States. We are following the guidance of the Centers for Disease Control (CDC), Centers for Medicare and Medicare Services (CMS), Local Health Authorities, and state guidelines in each of our locations.

Radiant Senior Living and our communities have taken this matter seriously as news developed regarding Covid-19. Our policies and procedures are updated and implemented as health authority guidelines change. The following actions have been taken since early-March.

Community Response to COVID-19:

- We have detailed and specific plans in place for a wide range of emergencies and illnesses. Our staff is trained in infection control practices, and we follow these protocols every day. We have ensured that our policies reflect up-to-date information provided by health authorities. We continue to provide additional training on an ongoing basis.
- We have increased and enhanced our cleaning procedures. We have purchased and implemented the use of the Bioesque's Botanical Disinfectant Solution and Victory Innovations Electrostatic Sprayer—a combination that can be safely used on all surfaces that kills Coronavirus.
- Public outings and events were discontinued.
- Individual resident engagement activities were continued, but we are no longer hosting group activities where social distancing cannot reasonably be maintained.
- Medical appointments are not disrupted, and telehealth is implemented where appropriate.
- Visitation is currently being limited to meet the local regulatory guidelines of each of our locations.
- All individuals entering our communities must sign in, sharing their contact information and agreement to our COVID-19 policies in addition to being screened by a temporal thermometer and must affirm a series of necessary questions in regard to COVID-19 risk factors attesting they have no signs nor symptoms, and have not traveled to an area of outbreak. In addition, all visitors must sign in, sharing their contact information, and agreement to policies regarding COVID-19.
- We are equipped with necessary PPE including surgical masks, N95 masks, gloves, gowns, and eye protection. Our team members must wear a mask and protective eyewear at each of our locations.

Visitor Protocol:

We appreciate your understanding at this time while we only allow essential visitors such as employees, medical professionals, and state agency personnel, as identified by state and federal guidelines inside our communities' buildings. Virtual visits are being scheduled regularly at all communities. Window visits and outdoor visits are being offered at some of our locations based on the guidelines of our local health authorities.

Visitors are screened prior to entry in the community and must limit contact within community, practice frequent hand hygiene, use appropriate PPE such as masks, and follow any additional direction provided by community staff members.

Screenings for Employees and Visitors Include:

- Confirmation that visitor is clear of symptoms of Covid-19, including fever, cough, or shortness of breath, sore throat, chills, repeated shaking with chills, muscle pain, headache, diarrhea, nausea, vomiting, loss of taste or smell.
- Affirmation that visitor has not received a positive Covid test within 10 days prior to visit.
- Confirmation that visitor has not been exposed to someone with Covid-19 within 14 days of visit.
- Confirmation that visitor has not traveled outside local area within 14 days of visit.

If a Confirmed Case Were to Occur:

If a confirmed case of COVID-19 were to occur within one of our communities, we will notify our residents along with their emergency contact, as well as continue to act in full compliance with local and state health authorities as well as the CDC. We will follow guidelines to decrease chances for exposure.

Scheduled Visits:

We understand the desire to connect with loved ones during this time. We are following these guidelines to help keep our residents and staff safe. We have set up technology to help keep our residents connected to loved ones virtually such as Skype, FaceTime, or phone calls. Please connect with the community staff to set up a virtual visit with a loved one.

Communities will have open window visits and outdoor visits as local health authorities allow. Please contact the community for the status of these type of visits and to learn how to schedule your visit.

Going Forward:

As we navigate this challenge, we remain focused on providing exceptional care and service for our residents. This includes sharing regular updates and information and taking any precautions required to limit the spread of illness or misinformation. We are thankful to our care staff and care partners in their efforts to provide the best in care and comfort for our residents.

We are confident in the guidelines set forth by the CDC and our local Department of Health. We encourage the local community to be proactive in preventing the spread of disease, but to avoid unsubstantiated rumors. For more information, please visit:
