

Updated October 2, 2020:

We are committed to continual communication regarding the status of our community and Covid-19. Our community Facebook page is updated regularly with information. As policies are updated, we also edit our website's emergency response banner with up-to-date information.

Visitation Notice:

In our September 22, 2020 communication to family members, we announced Limited Visitation with a number of required guidelines. It is concerning to hear that even with stringent guidelines in place, numbers of Covid positive cases are increasing rapidly in Gallatin County. The risk to our community members is on the rise.

With increasing numbers of new cases being reported daily and the increased risk level, we have made the difficult decision to suspend Limited Visitation effective immediately.

We at the Bozeman Lodge want to assure you that our primary goal continues to be caring for all the residents at our community and safeguarding their continued good health.

Our community has maintained its health and we wish to continue to do so. We assure you that your loved one is our top priority here at the Bozeman Lodge.

Our Policies and Procedures

As the progression of Covid-19 has affected the entire country, we remain dedicated to the health and wellness of our residents and team members. We have been implementing extra precautions since the first reports of confirmed Coronavirus cases in the United States. We are following the guidance of the Centers for Disease Control (CDC), Centers for Medicare and Medicare Services (CMS), Local Health Authorities, and state guidelines.

Bozeman Lodge has taken this matter seriously as news developed regarding Covid-19. Our policies and procedures are updated and implemented as health authority guidelines change. The following actions have been taken since early-March.

Community Response to COVID-19:

- We have detailed and specific plans in place for a wide range of emergencies and illnesses. Our staff is trained in infection control practices, and we follow these protocols every day. We have ensured that our policies reflect up-to-date information provided by health authorities. We continue to provide additional training on an ongoing basis.
- We have increased and enhanced our cleaning procedures. We have purchased and implemented the use of the Bioesque's Botanical Disinfectant Solution and Victory Innovations Electrostatic Sprayer—a combination that can be safely used on all surfaces that kills Coronavirus.
- Public outings and events were discontinued.

- Individual resident engagement activities were continued, but we are no longer hosting group activities where social distancing cannot reasonably be maintained.
- Medical appointments are not disrupted, and telehealth is implemented where appropriate.
- Visitation is currently being limited to meet the local regulatory guidelines.
- All individuals entering our community must sign in, sharing their contact information and agreement to our COVID-19 policies in addition to being screened by a temporal thermometer and must affirm a series of necessary questions in regard to COVID-19 risk factors attesting they have no signs nor symptoms, and have not traveled to an area of outbreak. In addition, all visitors must sign in, sharing their contact information, and agreement to policies regarding COVID-19.
- We are equipped with necessary PPE including surgical masks, N95 masks, gloves, gowns, and eye protection. Our team members must wear a mask and protective eyewear.

Visitor Protocol:

Visitors are screened prior to entry in the community and must limit contact within community, practice frequent hand hygiene, use appropriate PPE such as masks, and follow any additional direction provided by community staff members.

Screenings for Employees and Visitors Include:

- Confirmation that visitor is clear of symptoms of Covid-19, including fever, cough, or shortness of breath, sore throat, chills, repeated shaking with chills, muscle pain, headache, diarrhea, nausea, vomiting, loss of taste or smell.
- Affirmation that visitor has not received a positive Covid test within 10 days prior to visit.
- Confirmation that visitor has not been exposed to someone with Covid-19 within 14 days of visit.
- Confirmation that visitor has not traveled outside local area within 14 days of visit.

If a Confirmed Case Were to Occur:

If a confirmed case of COVID-19 were to occur, we will notify our residents along with their emergency contact, as well as continue to act in full compliance with local and state health authorities as well as the CDC. We will follow guidelines to decrease chances for exposure.

Going Forward:

As we navigate this challenge, we remain focused on providing exceptional care and service for our residents. This includes sharing regular updates and information and taking any precautions required to limit the spread of illness or misinformation. We are thankful to our care staff and care partners in their efforts to provide the best in care and comfort for our residents.

We are confident in the guidelines set forth by the CDC and our local Department of Health. We encourage the local community to be proactive in preventing the spread of disease, but to avoid unsubstantiated rumors. For more information, please visit:
