

state-of-the-art disinfection

The Hearth is proud to offer *Viking Pure Solutions'* electrochemically activated cleaning and disinfecting systems to our residents.

- Viking Pure generators produce **two kinds of natural cleaning agents**: a surface cleaner and a sanitizer.
- The surface cleaner is a highly powerful all-natural alkaline water solution. The sanitizer is hypochlorouacid, the same thing our bodies produces in response to infections
- Both agents are **completely nontoxic**, unlike many popular cleaning products.
- Per the EPA, "**Coronaviruses** are enveloped viruses, meaning they are one of the **easiest to kill with the appropriate disinfectant**
- Viking Pure's disinfecting products have **demonstrated effectiveness against multiple viruses similar to the Coronavirus.**
