

A letter to our Executive Directors, Wellness Directors, Program Managers, Resident Care Coordinators and Nurses,

First, I would like to thank and acknowledge all of you. You have been, and you are, on the front lines. You are the true heroes of our company and the true heroes of this pandemic.

In preparation for the COVID-19 vaccine, we will follow the CDC communication guidelines to ensure an effective vaccination campaign. We need as many employees and residents to take it as possible. The company's stance is to follow the experts and science. Personally, I intend to take it as soon as I can.

We are on the home stretch, and it's time to put the pandemic behind us. This vaccine will help us get back to normal, and I am excited to do that!

Sincerely,
Dan Williams | President & COO
