

Visit Guidance for Trilogy Senior Living Communities

- To be eligible for **indoor visitation**, a campus must be located in a county whose **COVID-19 positivity rate is below 10%**, or the campus must have a **resident vaccination rate of at least 70%**.
- Please practice **proper hand hygiene** before and after your visit, maintain social distancing with others in our campus, and properly wear your mask.
- While most visits do not need to be scheduled in advance and are not limited in their duration, as a courtesy, **we would ask that every effort be made to visit your loved one during normal business hours.**
- Every visitor must **pass our screening process** prior to entering the campus. This is a vital component of our infection control efforts!
- To allow for **adequate social distancing**, we ask that visits be limited to no more than 2 people at a time. If more visitors are expected, please contact the campus in advance so that the team can identify an area to host your visit and promote proper social distancing.
- If your loved one is **fully vaccinated (14 days have passed since their second vaccine dose)** social distancing is not necessary – bring on the hugs! Please be sure to perform proper hand hygiene both before and after your visit.
- If your loved one is not fully vaccinated, **social distancing** will be necessary during your visit.
- Unfortunately, residents who are in **quarantine/observation** are unable to have visitors until they are out of quarantine. End-of-life situations are an exception.
- **As always, if you are not feeling well, please refrain from visiting until you are feeling better.**

Please note that visitation may need to be suspended with little notice should a new COVID-19 diagnosis be determined at our campus.
