Programs & Services

When it comes to senior living your options are many, but when it comes to finding a community that truly values you as an individual with staff dedicated to enhancing health, wellness and lifestyle through programs and services uniquely tailored to residents in every level of accommodations and care, that list is far shorter. Welcome to Aurora on France, and welcome home.

We are dedicated to providing an innovative, comfortable and compassionate environment for our residents and their families. Friends (both new and old) will join together at weekly happy hours, monthly parties, musical performances, daily activities, exercise and more.

We support your well-being through our continuum of care so that you can age in place staying as independent as you're able, allowing you to add personal and health services as needed. We offer a variety of apartment floor plans – studio, one and two bedroom styles designed to meet your needs and preferences.

Senior Living ~ Whether you're completely independent or need some assistance, your needs will be met in our Senior Living. A full array of home care services can come to any apartment, so that you can age in place in the same apartment. Service options include chef-prepared meals and restaurant-style dining, 24/7 staffed professionals, health monitoring, individualized health and personal care based on your needs and preferences.

Dimensions Memory Care ~ We welcome you to experience our Dimensions Memory Care Program. What makes our program so special is not only the love that has been poured into the details, it's the personalization that showcases how we are designed so differently and have unique needs. The program features person-centered care, innovative and interactive training, specialized programming, thoughtfully created spaces and iN2L, a state-of-the-art computer technology system specifically designed to improve quality of life for older adults through person centered activities, programs, interests and much more.

Enhanced Care ~ Enhanced Care is a lovely alternative to a nursing home for those needing intensive levels of assisted living and personal care. Enhanced Care is often thought of as a step in between Assisted Living and a Care Center but in a home-like environment with care staff nearby around the clock.

Stay by the Day/Respite Suites ~ Our Stay by the Day suites are an option for individuals not ready to return home and still need some assistance with personal or health care needs. Suites are available to rent for a minimum of 5 days and come fully furnished. Stay by the Day rental includes three meals per day along with many other amenities and services. Those who decide to make their stay permanent receive \$500 off their first month's rent in Senior Living.

Transitional Care ~ Our transitional care unit or short-term rehabilitation provides skilled nursing care in a licensed nursing community, usually after a hospital stay. TCUs are special units that provide short-term therapy, medical care and can help bridge the gap between hospital care and returning home. Our TCU is located on our second floor and features three 21 bed pods that specialize in Cardio, Orthopedics and Medical-Surgical. We have nurse practitioners and physicians rounding seven days a week, speech, occupational and physical therapists staffing the therapy gym seven days a week as well as ceiling lifts located throughout the therapy gym to help with rehabilitation. Aurora on France TCU has a state of the art call light system to ensure we are responding to the needs of our clients on a timely basis.

Spiritual Health ~ To accompany the wonderful care that we provide, we offer Spiritual Health programs led by our full time chaplain. Our goal is to support the spiritual, relational and emotional healing and well-being of our residents. Our ecumenical services seek to serve the needs of this community directly and – in recognition of religious diversity and integrity – facilitate connections with local leaders and fellowships of all faiths. Some of the services we provide to our residents include:

- Spiritual care and counseling
- Advance care planning facilitation
- Eucharist, scripture study and prayer
- Rituals to mark sacred transitions

Life Long Learning ~ Our Life Long Learning Initiative is a collection of coordinated arts and education programs designed to foster growth and creativity for seniors. Life Long learning is the process of keeping your mind, body and spirit engaged — at any age — by actively pursuing knowledge and experience. Learning and growing helps everyone at every stage of life, and for seniors, the benefits are endless. Research has shown that with opportunities for self-expression and discovery, seniors experience vibrant living, artistic growth as well as improved mental and physical health. Life Long Learning helps our residents stay connected to their world — both locally and beyond.

Services & Amenities

Services and Care Provided ~ Our community offers care and services no matter where life takes you. From Independent Living to end-of-life care, we can meet your needs.

Personalized Service Assessment and Plan ~ Our personalized assessment evaluates individual needs and preferences. Then we customize a care plan to meet those needs and preferences.

Ongoing Dementia Training and Support for Staff/Family ~ Our associates are trained to understand the unique and unpredictable needs of our residents living with dementia hand in hand with providing an individualized approach. We understand that creative problem solving is needed when providing top notch, quality care to our memory care residents. We also have a Dementia Care Champion on staff to support our associates, residents and their families to ensure all elements of our Dimensions Program are being met.

Assistance with Personal Needs ~ Our trained staff is available around the clock to assist with resident's personal needs in the privacy of their own apartment according to their personalized care plan. We provide assistance with bathing/showering, clothing selection, dressing, grooming, hygiene, mobility/transfers and dining.

Ambulation and Escort Services ~ We will escort residents to meals and activities within building if it's in their care plan or if they are in our Dimensions Memory Care Community.

Dining/Nutrition ~ We serve continental breakfast, lunch and dinner daily. All menu options are selected and prepared by our Aurora Chef and Culinary Team to optimize nutritional value. Understanding that many older adults may have special dietary needs and unique preferences, we offer alternatives, finger foods and adaptive devices for every resident.

Housekeeping/Laundry Services ~ In senior living we provide on load of laundry per week and weekly housekeeping. In Enhanced Care along with Dimensions Memory Care, we provide the weekly laundry, housekeeping in addition to daily bed making and trash removal, this helps preserve dignity for our residents.

Incontinence Management ~ Our nursing team offers an in depth incontinence management program for residents that are in need of it, from reminders to scheduled physical assistance.

Nursing Services ~ Professional nurses oversee the delivery of healthcare and behavior management services to our residents. A licensed nurse is on-site 40 hours per week

Daily Activities and Programming ~ Prior to moving in, we gather information about each resident to understand their unique needs, interests and that give us a good picture of who they are. In Memory Care, we use My Way, which is a very in depth profile about each resident from what makes them smile to hardships to special memories, etc. in order to provide person centered care. Programs and outings are specially designed with residents' interests and abilities in mind. Multiple programs are offered throughout the daytime and evening hours. Senior Living, Enhanced Care and Memory Care Program hours and offerings will differ. All of our wonderful programs and activities are designed and supported by our Active Living Director and assistants.

Specialized Intervention Programs ~ We understand that consistent monitoring and intervention in specific areas can help avoid illness and/or injury and improve quality of life for residents. For this reason, we have developed and implemented nutrition tracking, weight management, behavior tracking and fall management programs.
