### Fun in the Sun: Hot Weather Safety Tips

Follow your medical professional's advice and speak with them before changing diet, exercise, or supplements.

Summer can be the most fun season of the year! With weather being warm and the sun shining bright, there are so many opportunities for activities outside - from gardening and picnics to ball-game watching and seashell hunting on the beach. To ensure a summer full of fun and one free from sunburns, heat stroke, or exhaustion, here are sun-safe guidelines to consider.

**Stay hydrated.** Older adults are especially susceptible to dehydration. The body's ability to conserve water reduces with age, as does thirst. It is important for older adults to drink lots of fluids and eat foods with high water content, like berries and celery. The Mayo Clinic's recommended daily water intake for men is 15.5 cups and for women is 11.5 cups.

**Use sunscreen.** Protecting the skin is always a good idea. A sunscreen with an SPF of at least 30 is recommended by the Mayo Clinic. Apply it at least 15 minutes before heading outside. It should be applied generously and reapplied every two hours or more if a person is swimming or sweating. Ears, scalp, lips, nose, hands, and neck are spots to remember!

Cover up. When headed out into the heat or sunglasses are smart for protective purposes. It is good to have a lightweight jacket handy to protect the skin from sun exposure. If possible, find a shady spot to be in.

Did You Know? Water, snow, sand and concrete reflect light and raise sunburn risk.

#### Try to avoid the sun during peak hours.

Peak sun hours are between 10 am and 4 pm, with the sun highest in the sky at noon and the temp. highest at 3 pm. UV rays from the sun are greatest between late spring and early summer in the U.S.

#### Pay attention to the heat index and UV index.

The Heat Index measures how hot it feels in a place when relative humidity is factored in with actual air temperature. It can be found on local weather websites. There is also a UV index for seeing how strong UV light is where you are at www.epa.gov/sunsafety/uv-index-1

#### Medications and sun don't always mix.

Certain medications can increase sensitivity to sun, it is best to wear loose-fitting, lightweight, sunlight. Sunburns, hives and rashes can result light-colored clothing. Wide-brimmed hats and if one is not careful while on such medications. Research your medications before going out.

> Have a great, safe summer! We hope these suggestions are helpful to you in your preparation for summer fun this year!

### **Special Moments**

Monte: July 5 Al: July 6 Pat A: July 21 Jackie S: July 24 Barbara S: July 29

Michael: July 1 Ciara: July 2 Katie: July9 **Shelley: July 13 Krystal**: July15 Zach: July 17
