Explore Paths to Improved Eye Wellness

Follow your medical professional's advice and speak with them before changing diet, exercise, or supplements.

August is Eye Exam Month and in observance, we've gathered some insight for eyesight! It can be frustrating to experience changes to eyes which result from an array of factors. Luckily, there are many ways to address eye health.

One of the best ways to stay on top of eye health is to have annual eye exams. Practicing precautionary measures through lifestyle is also important. People with diabetes, high blood pressure, or medications that affect eyes have increased risk for vision problems.

Some lifestyle recommendations from the National Eye Institute include having a diet rich in fruits and vegetables—particularly dark, leafy greens; maintaining a healthy weight; wearing glasses, goggles, and safety shields as appropriate; avoiding smoking; reducing eyestrain from screens by looking 20 feet before you for 20 seconds every 20 minutes; and cleaning hands often to avoid infections.

Knowing family eye history, and being educated about vision issues and symptoms that may affect seniors is also helpful toward eye wellness.

Four Eye Issues That Can Affect Older Adults:

- Dry eye is a common issue for seniors, in which not enough tears or quality tears are made, and poor vision may result.
- Age-related macular degeneration is an issue that causes central (not side) vision loss. The macula of the eye allows people to see fine details and colors, so when it is affected, activities like reading, watching movies, and recognizing faces could be challenging

Did you know? UV rays can negatively affect your eye's surface tissue, cornea, and lens. When in the sun, protect your eyes with sunglasses that have 100% UV or UV400 protection.

- Cataracts are cloudy areas in the eye lens (usually in both eyes, to different degrees) that can cause blurry vision, poor contrast awareness, dulled colors, and glare sensitivity.
- Glaucoma is a group of issues which damage the optic nerve and in time can take away side vision. While glaucoma is often painless with no symptoms, older adults are at risk for it.

With all that in mind, there are many ways to help vision conditions, per the American Optometric Association. Some optometrists have rehabilitation programs to help with low vision for daily routines. Prescription devices are also available, like spectacle-mounted magnifiers for close-up tasks; hand-held or spectacle-mounted telescopes for near and far vision; handheld and stand magnifiers to assist with short-term reading; and video magnification that enlarges items on video.

Let us know if this information has been helpful for you in the comments section of our newsletter Facebook post on the first.
