Achieving Better Balance & A More Active Lifestyle

Follow your medical professional’s advice and speak with them before changing diet, exercise, or supplements.

Do you ever feel lightheaded upon standing or feel your surroundings spin when taking a step? These are signs of balance issues. Most stem from the inner ear, but can be related to medications, the circulatory system, or blood pressure, among other causes. Fortunately, balance issues can be improved with attention to health, and action.

In September, Balance Awareness Week takes place, the 19th-25th. In observance, we’re sharing causes and improvement ideas.

Balance Issue Causes

Vertigo, lightheadedness, unsteadiness, and dizziness are four symptoms that can point to specific causes, per the Mayo Clinic. Causes are not limited to these, but can include: motion sickness, migraine, and Meniere's behind **vertigo**; cardiovascular issue or blood pressure change with movement behind **lightheadedness**; eyesight issue, medication, inner ear issue, leg nerve damage, or neurological issue behind **unsteadiness**; and inner ear issue, medication, or psychiatric issue behind **dizziness**. Balance disorders can bring about symptoms including but not limited to: confusion, disorientation, nausea and vomiting, diarrhea, changes in heart rate and blood pressure, fear, anxiety, or panic.

If you suspect you have an issue, speak with your medical professional for diagnosis and treatment. Depending on the issue, treatment can include medications to control dizziness and vomiting, balance retraining, inner ear

positioning procedures, surgery, change to diet (specific to the cause), and lifestyle change.

Lifestyle change many can benefit from is increased physical activity for muscle strength and flexibility. If your health professional approves, here are a few ideas to try, with a spotter present!

Exercises

- Tai Chi or Chair Chi! This is meditation in motion, with movements that shift weight from foot to foot, helping posture and balance.
- Hold a chair and stand on one leg at a time for several intervals.
- Tightrope Walking: Hold arms straight out at your sides. Walk a straight line with a 1-2 second pause as your back leg lifts from the ground. Have head up and eyes fixed ahead.
- Wall Pushups: Stand arm’s length from a wall. Lean forward slightly with palms flat on wall at height and width of shoulders. Keep feet in place as you move your body forward. Gently push back until arms are straight.
