Wednesday, February 2nd

## IPHONE

### 1. Youtube Video: iPhone Tips for Seniors: Basic Settings

a. By Rich Bowlin

i. Screen Brightness

1. Swipe down from the top right of your screen OR go into settings > display & brightness > use the toggle to slide to your preferred brightness.

ii. Auto Lock

1. Swipe down from the top right of your screen OR go into settings > display & brightness > auto-lock > then set your time. I typically use 3 minutes. After 3 minutes of inactivity, my phone will automatically lock. The longer you have your time set for, the more battery power it will use by keeping your phone lit up.

iii. Text Size

1. Swipe down from the top right of your screen OR go into settings > display & brightness > text size. Again, use the toggle to slide to your preferred text size.

iv. Bold Text

1. Swipe down from the top right of your screen OR go into settings > display & brightness > bold text. Hit the white dot, when you see green on the left side means that feature is on.

v. Display Zoom

1. Swipe down from the top right of your screen OR go into settings > display & brightness > display zoom. Select Standard or Zoomed.
