

# Rehab

## SUCCESS STORY

SHARING THE WINS!

Charlene inspires with her successful rehab therapy journey.

### MEET CHARLENE

## COMPASSIONATE CARE HIGHLIGHTS RECOVERY

Charlene “Char” Pfundheller was born in Stoughton, WI, and grew up in Missouri. She and her husband currently live in Shell Lake for half of the year and in Janesville for the other half. They have family in both places, including their three children and grandchildren, as well as a great-grandchild due in spring 2024.

Char came to Maple Ridge Care Center after a stay at St. Luke’s Hospital in Duluth. She found out there that there was a gallstone blocking the bile duct to her bowels. It was determined that the gall bladder itself was infected.

After having her gall bladder removed, she was weak and in need of some rest and recovery.

Maple Ridge Care Center offers 24-hour nursing care and offers in-house rehab services for occupational, speech and physical needs. Char said, “The rehab department helped me increase my strength so that I am able to return home.” She said she would recommend MRCC to others, stating that there are “friendly caregivers and residents.” We were happy to have Char here, and hope that she is able to enjoy some time with family & new great-grandchild next spring.
