SUCCESS STORY

SHARING THE WINS!

MEET ALLAN...

TOOLS TO SUCCEED AT REHAB THERAPY

Allan Morley was born and raised in the small town of Sampson, WI near New Auburn. He grew up as a middle child with an older brother and a younger sister. He has lived in Rice Lake for the past 3 years. Allan's son, Brent, helps his dad as much as he can, although he lives about 7 hours away in North Dakota.

While at home, Allan started becoming weak and knew something wasn't quite right. Friends were alerted and helped Allan get to the hospital for assessment. He had a urinary tract infection and was also diagnosed with Covid. After spending time in the hospital, Allan came to Maple Ridge Care Center to rest and recover.

At this same time, an old leg injury flared up, making it hard for Allan to stand or walk. Determined to get better, he worked with our Rehab Department to push past his pain and improve strength and mobility. "The Rehab Department gave me the tools and practice to succeed in my therapy journey," said Allan, who recommends Maple Ridge Care Center to others.

Allan Morley works on strength and healing with Brenda Ford (PTA) at Maple Ridge Care Center.

When asked what his favorite thing about Maple Ridge is, he couldn't pick just one thing. To sum it up he said, "The care. I have enjoyed the time and effort that the nursing, activities, and therapy staff put into my stay and success here." Allan's words of advice for others who may find themselves in a similar situation is, "Have patience, find a good support system, and be kind."

We have enjoyed getting to know you, Allan, and wish you the very best as you continue your recovery.
