MARCH PICTURE HIGHLIGHTS

FOREVER FIT: THE PERFECT PAIR

A strong body starts from the ground up and choosing the right shoes is a key part of keeping our feet healthy. Correctly fitted shoes can help to reduce foot, knee, hip and back pain and promote healthy circulation. Shoes with low-padded heel drops, proper arch support and wide bases with good traction can also drastically help to reduce the risk of falls. As we age it's not uncommon for our feet to also get wider and flatter. Nearly 1/3 of seniors will suffer from chronic foot pain, much of which is caused by ill fitted footwear. Having your feet accurately measured by professionals who specialize in shoes for seniors can help to ensure a well fitted shoes and feet that will feel the difference.
