

Food Delivery Tips

For more local food options visit:

www.visit29.org

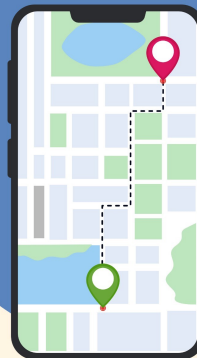

Base Access

Before accepting an order, drivers are able to see the customer's name, but not their exact drop-off location. Setting your name to "(Name)NeedBaseAccess" helps mitigate getting a driver that can't enter the installation.

Drop-Off Location

Make sure your pinned location is accurate. If delivering to an apartment, ensure your porch light is on so drivers can see. When ordering to the barracks, make sure to wait by the duty desk for your items.

Payment Security

To secure your card information on food delivery apps, first, avoid saving your card details on the app. Instead, use payment systems like digital wallets or virtual cards. Enable two-factor authentication for added security.

Delivery Times

Be aware of estimated delivery times and plan accordingly. Consider using scheduled delivery options to ensure an on-time delivery.
