September 2025 THE MONTHLY GAZETTE

"Ah, September! You are the doorway to the season that awakens my soul."

~ Peggy Toney Horton

Plant of the Month – Spider Plant

The quick-growing spider plant has been a popular houseplant for decades. It was first introduced to Europe from Africa in the late 18th century and soon became a favorite in Victorian households. Its lovely, graceful, striped leaves give any decor a bright burst of color and style. In addition to their beauty, these hardy, full plants help purify the air. They thrive indoors and out in most conditions, even when neglected. It's also easy to grow new plants from the originals. The spider plant gets its name from the small, white, star-shaped flowers that sprout at the end of its stems, which

then form the mini plantlets called "spiderettes" that can be planted on their own. The plant is nontoxic, so it's safe to have spider plants around pets. Due to their fresh, vibrant appearance and their ability to survive the lack of attentive care, spider plants are associated with good luck, resilience, abundance, new beginnings, and good fortune.

Special Days

Labor Day
September 1

International Day of Charity
September 5

Grandparents Day & Full Corn Moon

September 7

World Gratitude Day
September 21

The Beginning of Autumn & Rosh Hashanah
September 22

Flower – Aster

A symbol of love and patience, September's flower is the late-flowering aster. In ancient times, these dainty blooms were considered the afterthought of the Roman goddess Flora because they bloom well after most other flowers. These mid- to late-summer stunners are named after the Greek word for "star." Asters come in a beautiful range of colors, including pink, purple, blue, and red, with a yellow or black center.

Birthstone – Sapphire

The sparkling blue sapphire is made of corundum. Interestingly, when corundum is red, it is called a ruby. The most expensive sapphires are mined in Kashmir and Myanmar, but they are also found in Australia, Africa, and India. Sapphires are very hard and durable, and they symbolize truth and fidelity. Some ancient cultures believed that if the wearer was unfaithful, the stone would not shine. Sapphires were also thought to have powers that healed inflammation, bleeding, and eye and ear problems.
