April 2026

THE MONTHLY GAZETTE

*"A gush of bird-song, a patter of dew,
A cloud, and a rainbow's warning.
Suddenly sunshine and perfect blue—
An April day in the morning."*

~ Attributed to Harriet Prescott Spofford

Animal of the Month – Peregrine Falcon

The majestic peregrine falcon is known for its spectacularly fast flying and is the fastest animal in the world. It averages between 25 and 34 miles per hour while traveling, but reaches 69 to 200 miles per hour when pursuing food. This powerful bird's meal of choice is small- to medium-sized birds, such as pigeons, sparrows, doves, and ducks. Bird-eating raptors are called *avivores*. They swoop down from high above, snatching prey from the air. If birds are scarce, they will hunt for rodents, bats, small reptiles, and insects. Peregrine falcons have been trained by humans

for hunting for more than a thousand years. They typically live well into their teens, with the oldest on record reaching nearly 20 years old. This falcon enjoys nesting on cliffs and lives in a range of habitats, from urban environments to shorelines. The females are larger than the males. Peregrines are found on all continents except Antarctica.

Flower – Daisy

April's flower is the dainty daisy. It gets its name from the Anglo-Saxon *day's eye*, as it looks like a sun and opens with sunshine, and it represents innocence and purity. Legend tells that the first daisy appeared when a young nymph transformed into one to avoid unwanted attention. In Norse mythology, the daisy is the flower of Freya, goddess of love, motherhood, and beauty. Romantics often pull off daisy petals one by one to tell if "he loves me" or "loves me not."

Birthstone – Diamond

The gorgeous, glittery diamond is the birthstone for April. For centuries, this stone has been synonymous with romance, intrigue, power, greed, and magic. In the Middle Ages, it was believed to cure headaches and to create love potions. Today, diamonds symbolize everlasting love and devotion and are traditionally the stone of choice for engagement rings. The diamond is the hardest material in the world, making it useful for cutting, carving, and polishing.
